Alexandre Tozzini

Senior Software Engineer · Ruby on Rails · Golang · Full-Stack

Florianópolis, SC, Brazil · +55 19 9 9959-1111 · tozzini@proton.me · linkedin.com/in/alexandre-tozzini · github.com/atozzini

PROFESSIONAL SUMMARY

Software developer with 10+ years of experience, working on critical systems for public health, education, pension funds, payments and property management. Full-stack profile with a strong backend focus: Ruby on Rails (since 2017) and Golang (Clean Architecture and DDD), plus React.js and Angular on the frontend. Experience with PostgreSQL, MySQL and Oracle (PL/SQL), AWS, Docker and Linux server administration. Has worked as developer, tech lead and sysadmin, with focus on legacy system modernization, integrations with external systems and automated tests. Looking for technically challenging projects that make a real difference.

TECHNICAL SKILLS

Back-End	Ruby on Rails · Golang (Clean Architecture, DDD) · Python · Sidekiq · REST APIs · SOAP/XML
Front-End	React.js · Angular · JavaScript · HTML5 · CSS3
Testing	RSpec · FactoryBot · Capybara · TDD
Databases	PostgreSQL · MySQL · Oracle (PL/SQL) · SQL Server · Redis
Cloud & Infra	AWS (EC2, RDS, Lambda, Amplify, CloudFront) · Docker / Docker Compose · Linux
Observability	Sentry · Zabbix · Loki · Prometheus
Tools	GitHub · Bitbucket · Azure DevOps
Methodologies	Scrum · Kanban · Code Review · Branch Protection
Languages	Portuguese (native) · English (B1 – intermediate) · German (B1) · Italian (A2 – basic)

PROFESSIONAL EXPERIENCE

Software Engineer | Plathanus Software & Design | *Nov 2025 – Present*

- Maintain and improve a portfolio of 4 connected Ruby on Rails systems for a property management company, from a legacy app (Rails 2 / Ruby 1.8.7) to modern Rails 7 apps with Sidekiq.
- Integration with government APIs to issue electronic invoices, with XML generation and digital certificates.
- Integration with external systems: ERPs (SOAP/Web Services), CRMs (OAuth2) and HR/payroll APIs.
- Also work as sysadmin: Linux servers in production, staging and containers, Docker/Docker Compose and MySQL administration.
- Diagnose and fix critical incidents, including kernel crashes on legacy servers; monitoring with Zabbix, Loki and Prometheus.
- Deploy pipeline with Git/GitHub, branch protection rules and automation scripts.

IT Business Analyst | Previg Previdência Complementar | *Mar 2025 – Nov 2025*

- Built REST APIs in Golang with Clean Architecture and DDD for pension fund systems.
- Web applications with Angular and PL/SQL solutions on Oracle and PostgreSQL for critical systems.
- Handled support tickets and system maintenance; Docker, Bitbucket/GitHub and automated tests.

Full-Stack Software Engineer | Appolus Tecnologia | *Mar 2024 – Dec 2024*

- Public health projects with Ruby on Rails, React.js, Python and Go.
- Backend with Rails and PostgreSQL; Docker containers, deploy on AWS and error tracking with Sentry.

Full-Stack Software Engineer | Engefoto Engenharia e Aerolevantamentos | *Jul 2023 – Feb 2024*

- Urban land registry and aerial survey systems with Ruby on Rails, ExtJS, React.js and PostgreSQL.
- Performance improvements that reduced page load time; led key projects using Azure DevOps.
- Active part of Agile sprints and code reviews.

Full-Stack Software Engineer | Vindi Pagamentos | *Oct 2022 – May 2023*

- Built features for an online payments platform, with Ruby on Rails on the backend and React.js on the frontend.
- Automated tests with RSpec; task management with GitHub Projects in an Agile team.

Tech Lead / Full-Stack Software Engineer | Caiena | *Dec 2020 – Oct 2022*

- Led the development of web projects for the public education system with Ruby on Rails, JavaScript and MySQL.
- TDD with RSpec, Redis and infrastructure on AWS (EC2 and RDS); Scrum and Kanban.

Back-End Developer | Kazap Technology | *Jul 2017 – Nov 2020*

- Built systems for public health and public education with Ruby on Rails, JavaScript and PostgreSQL (heavy use of advanced functions).
- Reports with Jasper Studio; helped the team adopt Scrum and Kanban.

EARLIER EXPERIENCE

Software Development Intern | CI&T | *Feb 2016 – Jun 2017*

- Internal system for a port operations company with Delphi, Java and Oracle 11g (PL/SQL).

Software Developer | ISMA | *Sep 2010 – Jan 2016*

- Internal system with Delphi and SQL Server; VBA macros integrated with AutoCAD for steel structure budgets.

EDUCATION

MBA in Big Data and Data Management / AI · VincIT Innovation Center — UNICIV, 2020–2023
Technologist Degree in Systems Analysis and Development · Fatec Mogi Mirim — Arthur de Azevedo, 2014–2017
Technical Course in Computing · ETEC Pedro Ferreira Alves, 2005

CERTIFICATIONS

Certified ScrumMaster® (CSM) · Scrum Alliance, 2021
